

kisscpp::manip::base

```
graph LR; A[kisscpp::manip::base] --> B[kisscpp::LogStream::base];
```

The diagram illustrates a base class relationship. On the left, a gray rectangular box contains the text `kisscpp::manip::base`. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text `kisscpp::LogStream::base`, which is split into two lines: `kisscpp::LogStream` on the top line and `::base` on the bottom line. Both boxes have a thin black border.

kisscpp::LogStream
::base
